

BRA-IN Modem

Save time, money and be better informed

With a modem installed in your machine you can focus on your work, not handling waste. Set notifications to allow for automatic pick-up of bales, service and consumables by demand.

Service visits based on simple errors can be avoided, when connected our service department can confirm error types – or assist per phone to clear simple errors saving you unnecessary costs.

Please note that use of modem requires annual SIM card subscription. Compatibility is ensured when BRA-IN approved modem is purchased.

Highlights

- Lower service costs through remote access.
- Automated pick-up based on bales ready.
- Notifications for machine errors via e-mail.
- 4 levels of access notifications.
- Automated consumables ordering possible.
- Remote change of equipment settings (by service technician).

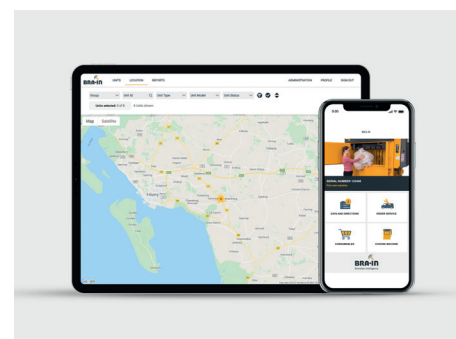

Details

One global SIM card subscription is offered and included in modem kit, ensuring functionality and affordability.

BRA-IN logo ensures compatibility with existing and future BRAMIDAN® products and services.

With connection via modem you get access to the BRA-IN Webportal or BRA-IN App.
